

Nykaa – Beauty Store E-Commerce Database

Chapter – 1

1.0 Introduction:

The Nykaa – Beauty Store project is an online e-commerce platform developed to provide customers with a convenient way to purchase beauty, skincare, haircare, wellness, and personal care products. The website allows users to register, browse products, search by category, view product details, add items to the shopping cart, place orders, and make secure online payments. It also enables administrators to manage products, customers, inventory, and orders efficiently. The project aims to provide a simple, secure, and user-friendly shopping experience while improving customer satisfaction.

1.1 Problem Statement:

With the increasing demand for online shopping, customers expect quick and convenient access to beauty products. However, traditional shopping requires visiting multiple stores, which consumes time and effort. Customers may also face limited product availability, difficulty in comparing products, and lack of detailed product information. This project solves these issues by providing an online platform where customers can easily search, compare, purchase, and track beauty products from anywhere at any time.

1.2 Objectives:

The main objective of the Nykaa Beauty Store project is to develop a secure, reliable, and user-friendly e-commerce website that allows customers to purchase beauty and personal care products online with ease. The project also aims to simplify product management, order processing, and customer services for administrators.

1.3 Key Objectives:

- Provide an easy online shopping experience.
- Offer a wide range of beauty products.
- Allow secure user registration and login.
- Enable product search and filtering.
- Support shopping cart and wishlist features.
- Provide secure online payment options.
- Manage customer orders efficiently.
- Help administrators manage inventory and products.
- Improve customer satisfaction.
- Increase business efficiency and sales.

1.4 Stakeholders:

The major stakeholders involved in the project are:

- Customers
- Administrator
- Beauty Product Suppliers
- Delivery Partners
- Payment Gateway Providers
- Website Management Team
- Business Owner

1.5 Business Requirements:

- Develop an online platform for beauty product shopping.
- Allow customers to register and log in securely.
- Display products with images, descriptions, prices, and offers.
- Provide category-wise product browsing.
- Support shopping cart and wishlist.
- Enable secure online payment.
- Generate order confirmation and invoices.
- Allow administrators to manage products, inventory, customers, and orders.
- Maintain customer purchase history.
- Ensure fast and reliable service.

1.6 Functional Requirements:

- **User Management** – Register, login, and manage user accounts.
- **Product Management** – Add, update, delete, and display beauty products.
- **Product Search** – Search, filter, and browse products by category.
- **Shopping Cart** – Add, update, and remove products from the cart.
- **Wishlist** – Save products for future purchase.
- **Order Management** – Place, track, cancel, and view orders.
- **Payment Management** – Process secure online payments and generate invoices.
- **Reviews & Ratings** – Allow customers to rate and review products.
- **Admin Management** – Manage users, products, inventory, and orders.

1.7 Non-Functional Requirements:

- **Security** – Protect customer information and ensure secure payments.
- **Performance** – Load pages quickly and process requests efficiently.
- **Reliability** – Ensure accurate and consistent system operation.
- **Availability** – Ensure uninterrupted access to the online shopping platform
- **Scalability** – Handle increasing users, products, and orders.
- **Usability** – Provide a simple and user-friendly interface.

- **Data Integrity** – Maintain accurate and consistent customer and product data.
- **Maintainability** – Support easy updates, bug fixes, and future enhancements.

1.8 Motivation of the Project:

The motivation behind the Nykaa – Beauty Store project is the rapid growth of online shopping and the increasing demand for beauty and personal care products. Customers prefer purchasing products online because it saves time, offers a wider variety of brands, and provides attractive discounts and home delivery. Traditional shopping often involves travelling to different stores and limited product availability.

This project addresses these challenges by creating an efficient e-commerce platform where customers can browse products, compare prices, read product reviews, and place orders from anywhere. It also helps businesses manage products, inventory, and customer orders efficiently. Furthermore, this project provides practical experience in designing and developing a real-world e-commerce application using modern web technologies, database management, and secure payment systems.
